PROFESSIONAL SUMMARY

Software Engineer with 20+ years in the industry — since 2002. Throughout my career I focused on mobile development, particularly Android, delivering products across fintech, e-commerce, aviation, streaming, IoT, and retail. What drives me is the craft itself: software that works well, scales cleanly, and makes a genuine difference. I love collaborating proactively with teams of all sizes — startups, large tech companies, distributed squads across different countries and cultures. I believe in agile ways of working, clean code, and a real commitment to the product. Whether I'm engineering, leading, or advising — I bring the same passion to every role.

WORK EXPERIENCE

REWE digital

Senior Android Engineer

Apr 2025 — Present | Málaga, Spain · Hybrid

- Building internal tools and customer-facing Android solutions for one of Germany's largest grocery retail platforms.
- Clean Architecture (MVI), Jetpack Compose, REWE Design System (RDS) integration.
- Led technical investigations and architectural documentation for hardware integrations and legacy refactors.
- Close collaboration with UX, Product, and Backend across multiple squads.

Technologies: Kotlin, Compose, MVI, Hilt, Coroutines, Flow, GitLab CI/CD

Latch
